

RE-KNOX AIMS AND OBJECTIVES:

Re-KnoX, our second international conference, stands for Research in Education – Knowledge Exchange, and aims to foster meaningful connections and collaboration between researchers and practitioners across the MENA region and Global North. It builds upon the resounding success of our inaugural event held in Cairo, Egypt. The first conference laid the groundwork for fostering fruitful collaborations, generating impactful research outputs, and securing essential funding for collaborative endeavors. In 2022 we had a wide range of submissions related to the theme: Education In Times Of Crisis: Global And National Challenges. It resulted in publications in the indexed journal of JESMA and funding grant with the British council, and several collaborative papers and events. Now, with Re-KnoX 2025, we aim to deepen these connections and broaden our reach to create a more inclusive and equitable landscape for educational research.

At its core, Re-KnoX remains committed to bridging the gap between researchers and practitioners from diverse regions across the globe, through establishing platforms that promotes fairness, equity, and inclusivity in knowledge production and dissemination. These platforms aim to recognize diverse perspectives, amplify marginalized voices, and challenge existing power structures within educational research. Re-KnoX provides a space for thought-provoking discussions and innovative ideas, through facilitating conversations that challenge conventional wisdom, explore new paradigms, and envision transformative educational practices. By diversifying educational research Re-KnoX recognizes the importance of decolonized perspectives in shaping educational knowledge, interdisciplinary approaches and valuing various cultural contexts. As such our conference enriches the field of educational research.

Moreover, Re-KnoX is dedicated to extending networks that transcend traditional hierarchies and power dynamics. We believe that true collaboration requires mutual respect and reciprocity among all stakeholders involved. As such, our conference provides a space for researchers, practitioners, policymakers, and other key actors to come together as equals, sharing insights, expertise, and resources for the collective advancement of educational research and practice. By involving these diverse voices, the conference aims to bridge theory and practice, ensuring real-world impact.

In addition to promoting collaboration and knowledge exchange, Re-KnoX is committed to diversifying and decolonizing educational research. Recognizing the legacies of colonialism and imperialism that continue to shape academic discourse, we strive to challenge dominant narratives and center marginalized voices in our work. Through initiatives such as peer support, diverse representation, and critical dialogue, Re-KnoX is a dynamic platform that promotes collaboration, diversity, and equity in educational research.

Furthermore, Re-KnoX recognizes that the impact of research extends beyond academic circles and into the realms of policy and practice. To maximize our influence and relevance, we actively engage with practitioners and policymakers, inviting them to participate in our conferences and contribute their perspectives to the conversation. By bridging the gap between research and practice, Re-KnoX aims to ensure that scholarly insights are translated into tangible actions that benefit learners and communities worldwide.

In conclusion, we extend a warm invitation to academics, early career researchers, postgraduate students, practitioners, and policymakers to join us for the Re-KnoX conference from February 24th to 26th, 2025, in Rabat at the Mohamed V University, Faculty of Science of Education. Your participation is crucial in fostering meaningful dialogue, collaboration, and action towards a more just and equitable future for educational research and practice. Together, let us embark on this transformative journey as we work towards building

inclusive and impactful networks that transcend borders and boundaries. We look forward to welcoming you to Re-KnoX 2025 in Rabat!

RE-KNoX 2025

Conference Title:

Education for All: Empowering Minds, Shaping Futures, and Fostering Equity

Concept Note:

Education is a fundamental human right and a powerful catalyst for societal transformation. However, despite global efforts, millions of individuals still lack access to quality education due to various barriers such as socio-economic status, geographic location, and cultural factors. The "Education for All: Empowering Minds, Shaping Futures, and Fostering Equity" conference seeks to explore the transformative potential of education in breaking down these barriers, fostering inclusivity, and shaping a more equitable future for all.

At the heart of this conference lies the recognition of education as the cornerstone of personal and societal development. By providing every individual with equal access to quality education, regardless of background, we not only unlock boundless opportunities but also nurture talents and cultivate brighter futures for generations to come. Moreover, promoting equality in education is imperative for building a more just and equitable society where everyone can realize their full potential. This noble endeavor transcends borders and cultures, fostering global cooperation and understanding.

Innovative methodologies play a crucial role in advancing the mission of education for all. As we navigate the complexities of contemporary educational challenges, embracing progressive teaching methodologies, innovative learning conceptualizations, and successful practices becomes essential. The integration of technology, in particular, holds immense promise in enhancing access to education and facilitating personalized learning experiences. However, it is imperative to address the challenges posed by this integration, including concerns related to security, privacy, and the potential devaluation of human interaction in the learning process.

Governance and education policies are equally pivotal in shaping the landscape of education in the modern era. Decision-making processes in education are multifaceted and involve various stakeholders, making the task of balancing interests while ensuring accountability and transparency extremely complex. The politicization of education policy further complicates matters, often diverting focus from evidence-based approaches and ethical considerations. Addressing issues of resource adequacy and distribution is essential to mitigate educational disparities among different communities and promote equity and quality education for all.

The conference will provide a platform for scholars, policymakers, educators, and stakeholders from around the world to engage in critical dialogue, share insights, and collaboratively develop strategies to advance the agenda of education for all. Through keynote presentations, panel discussions, workshops, and networking sessions, participants will explore innovative approaches, best practices, and policy recommendations aimed at fostering inclusive, equitable, and quality education systems globally.

Together, let us harness the transformative power of education to unlock possibilities, shape futures, and promote equality for all individuals, irrespective of their circumstances or backgrounds. Join us in this endeavor to build a world where education truly becomes a beacon of hope and empowerment for every individual and society at large.
